This is a marvellous work, and the *renaissance* of church instrumental music. It is the book of the epoch. We could have as little anticipated this stupendous emanation of a giant genius, as the revival of the mediatorial dances, the discovery of the ancient *chorus* to each of the psalms, or the *tableux vivans* of a Mosarabic celebration, Cardinal Ximenes and his choir dancing with a decorum equalling their devotion before the high altar in the Great Cathedral of Toledo. Hitherto religion has had only one organist, Sebastian Bach, the solitary high priest, to whom was given that eloquence of song mightier than that of speech, and who living only for his church, and wholly intent upon the truth, quickened and embodied it into the high symbols of a pure and primitive form of Christian worship. Bach was the apostle of church musical art: his mission was the marriage of beauty with devotion; and most reverently, and yet, withal, most gorgeously, did he celebrate the rites. He dies, and a century passes away. The temple of harmony, the scene of his mission and his accomplishments, remains open. We can see the long nave, the groined arches of the aisles, the sweet repose of the choir, and the clear obscure of the long distant chapels—mysterious echoes float around the building, but before the door there undulates an aerial and crystal-lined curtain, which refuses to yield except to a like spirit—to the same single-minded devotion—to the same mighty assiduity in holy ministrations. A century has passed, and Mendelssohn, separating himself from his contemporaries, purifying himself by the same loneliness and solitary communion with the parent of all that is good and beautiful, raises the veil, and enters to assist in the perfect development of that of which his prototype had so wondrously laid the corner stone, and outlined all its glorious details. There are now two organ composers; the present epoch has evolved a second in Felix Mendelssohn.

These organ sonatas challenge all rivalry—defy all competition. No living mind but Mendelssohn's could have conceived them."—*Morning Chronicle*, March 6th, 1846.
